

在功能注册下找到对应的XML ，在对应的XML中添加以下代码

```
<!-- 附件管理 -->
```

```
<bean id="attachMentMngAction"  
class="nc.ui.ic.general.action.GeneralAttachmentAction">
```

```
<property name="model" ref="manageAppModel" />
```

```
</bean>
```

```
<bean id="assistantFunctionBrowseAction_IN"  
class="nc.funcnode.ui.action.MenuAction">
```

```
<property name="code">
```

```
<value>NastMngBrowseAction</value>
```

```
</property>
```

```
<property name="name">
```

```
<bean class="nc.ui.uif2.I18nFB">
```

```
<property name="resDir" value="10h0_5" />
```

```
<property name="resId" value="10h0_5" />
```

```
<property name="defaultValue" value="关联功能" />
```

```
</bean>
```

```
</property>
```

```
<property name="actions">
```

```
<list>
```

```
<ref bean="attachMentMngAction" />
```

```
</list>
```

```
</property>
```

```
</bean>
```

```
<ref bean="assistantFunctionBrowseAction_IN"/>
```
